

## TAG SXSW

Help make sense of all the music out there and tag up the real world.

Is it indie? Is it hip-hop?

Are you neo-post-awesomcore?

Tell us!

At your service is a sticker 'tag cloud' (different ways people have been classifying SXSW bands on Last.fm lately), plus some prefixes and suffixes to make up your own new genres.

## SO META IT HURTS

How to play

1. Take a pic of your real-world tag (before it gets tagged over)

2. Upload your pics to [www.flickr.com](http://www.flickr.com) and tag them with 'tagsxsw' (yup, we're talking about the other kind of tags now)

3. Visit [www.last.fm/sxsw](http://www.last.fm/sxsw) to see how the real world tags up.
